

ghost[®]

A WHOLE NEW WORLD

ghost[®] Acoustic MIDI System

US and world patent pending.

Designed to integrate easily into a steel or nylon string acoustic guitar, the ghost Acoustic MIDI System will open a new world of tonal possibilities never before available to the acoustic guitarist.

- No metal saddles to retain a natural and authentic acoustic tone.
- Fastest, most accurate MIDI tracking available.
- Saddle pickups fit a standard 1/8" saddle slot.
- Flexible installation permits custom control layout.
- Plug-in components for rapid assembly and testing.
- Patented String Saver[®] saddles to dramatically reduce string breakage.
- Compatible with today's state-of-the-art controllers such as Roland GR33, GI-20, VG99, and V Bass, Axon AX-50, AX-100, and many more.

MSRP: \$349.95 USD

ACOUSTIC MIDI SYSTEM

The ghost Acoustic MIDI System

Finally, a MIDI pickup system designed specifically for the acoustic guitar. Most acoustic MIDI systems use metal saddle pickups which destroy the natural and authentic sound of your acoustic guitar. The **ghost Acoustic MIDI System** retains a natural and amplified acoustic sound with unlimited MIDI possibilities.

The ghost Acoustic MIDI System adds MIDI interface capability, studio quality acoustic preamp and unparalleled fast and accurate tracking for most nylon or steel string acoustic guitars.

The same set of pickup saddles drives both the MIDI and acoustic modules at the same time!

FEATURES & BENEFITS

- No metal saddles to retain a natural and authentic acoustic tone.
- Fastest, most accurate MIDI tracking available.
- Saddle pickups fit a standard 1/8" saddle slot.
- Flexible installation permits custom control layout.
- Plug-in components for rapid assembly & testing.
- Patented String Saver® saddles to dramatically reduce string breakage.
- Compatible with today's state-of-the-art controllers such as Roland GR33, GI-20, VG99, and V Bass, Axon AX-50, AX-100, and many more.
